Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 46-69 & 85, drawn to delivery devices and methods of using to deliver conduits to heart wall, classified in class 606, subclass 108.
- II. Claim 70, drawn to a method for introducing a guidewire through coronary vessel, classified in class 606, subclass 153.
- III. Claims 71-84, drawn to fluid shunt/conduit/stent, classified in class 604, subclass 8.

The inventions are distinct, each from the other because of the following reasons:

Inventions I & II and II & III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions different modes of operation, or are different procedures, thereby resulting in different outcomes.

Inventions III and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a different process of using, such as draining fluid from the eye into the surrounding tissue.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If applicant should choose to elect the invention of Group I, a further election of species is required.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species A: Figures 1A-E, 3, 4, 5, 5A-5C
- Species B: Figure 2
- Species C: Figures 10A-C
- Species D: Figures 14A-B & 15
- Species E: Figure 7
- Species F: Figure 9
- Species G: Figures 16 & 16A
- Species H: Figures 16C & 16D
- Species I: Figures 16E & 16F

- Species K: Figures 16J -16N
- Species L: Figures 16O-16S
- Species M: Figures 17 & 18

- Species O: Figures 20A-20B
- Species P: Figures 22, 22A & 22B
- Species Q: Figure 33A
- Species R: Figures 39A-39B

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is considered generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 3762

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

If applicant should choose to elect the invention of Group II, a further election of species is required.
